CAPITAL'S "MOVIES" MAGNATES SEEKING TO OBTAIN "TALKIES"

Want Samples of First Output
of Edison's New Invention,
the Kinetophone.

Washington moving picture magnates are making strenuous efforts to obtain samples of the first output of Thomas A. Edison's newest invention, the kinetophone, or moving pictures which talk.

Mr. Moore learned today that arrangements were being made to put the invention on the market, and immediately wrote asking that his theater be considered.

Chase's Theater, which has just installed the kinetophone picture films, has made no arrangements yet for the change. The kinetophone has been received very warmly and as the kinetophone is still in its infancy the management will look into it carefully before taking it up.

Will You Help?

The Associated Charities and Citizens' Relief Association appeal for the generous aid of the people of Washington. The societies are dependent upon voluntary contributions and are greatly in need of funds. They require \$28,000.00 to meet their responsibilities to the poor of Washington. Their work is city-wide, knowing neither race nor creed. They can only do what their contributors make possible.

Is this work worth while? If you think so will you now send a contribution today?

A City in Itself

THE Southern Building is the most popular and populous office building in the National Capital and is generally regarded as the finest office building in the South. About 14,000 people pass through its doors daily. From 9 a. m. to 6 p. m. the average of tenants and visitors is 1,600 per hour. The tenants of the Southern Building represent industrial and financial interests whose combined resources aggregate many millions of dollars. Located at 15th and H Streets (the new financial center of Washington) the Southern Building affords you unparalleled advantages for the location of your business offices—where you will be brought into daily personal contact with the maximum number of thrifty and successful citizens.

The space in the Southern Building is 93 per cent rented. The few remaining offices—still subject to lease—are all desirable outside rooms with splendid light and ventilation. The Renting Offices are located on the second floor and your application for a lease should be filed promptly in order to receive favorable consideration.

WILLIAM FRANK THYSON, Manager
SOUTHERN BUILDING
15th and H Streets N. W.

The Southern Building at present has nine stories. Being completed only fifteen months ago, it is of strictly modern architecture and equipped with every business facility, including four high-speed elevators which run at minute intervals. The original plans of the architects (the well-known firm of D. H. Burnham & Co., of Chicago,) provided for the construction of eleven stories, instead of nine. The management contemplates the early erection of these two additional stories, in order to meet the demands for space made by various clubs, social organizations, and business corporations which cannot now be accommodated.
